Directorate-General Joint Research Centre

Institute for the Protection and the Security of the Citizen
Support to External Security Unit

Internships Information Technology

Reference 4312/IAF/2006/1

We are searching for highly talented and motivated students of Information Technology, Computer Science, or a similar field. We are offering you the opportunity to join a small, dynamic, and highly dedicated multicultural team of professionals, and a fantastic experience that will develop your skills and knowledge for your future career in the IT industry. This is an opportunity to work with the most up to date technologies, in a project based on information gathering and extraction. Send us your application today.

Profile

- experience with programming in Java
- experience with SQL databases (Oracle) and web servers (Tomcat)
- experience with web technologies (HTML, Java Server Pages, JavaScript, cookies, beans)
- good analytical and problem solving skills
- good spoken/written communication and good interpersonal skills
- good command of English and other European languages would be an advantage

Tasks

- development of software components for data collection from different sources
- modify, use, debug and test existing software components
- produce documentation and possibly technical papers
